EDUCATION

Lovely Professional University

Bachelor of Technology Honors in Computer Science and Engineering
Industry Collaboration in Applied Artificial Intelligence with Kalvium

Punjab, India

CGPA: 9.54

Aug 2025 - Aug 2029

PROJECTS

• Movie Recommender System

Python, Pandas, Scikit-learn

Machine Learning Project

[GitHub Repository](#)

- Built a content-based recommendation system to suggest movies based on similarity metrics.
- Performed data preprocessing, feature extraction, and recommendation generation using machine learning techniques.
- Improved user experience by providing personalized movie recommendations from large datasets.

• SkyFetch Weather Dashboard

HTML, CSS, JavaScript, Weather API

Web Application

[GitHub Repository](#)

- Developed a responsive weather dashboard using real-time weather API integration.
- Implemented location-based search and dynamic weather information display.
- Designed an interactive user interface with responsive layouts and data visualization features.

• Threadless E-Commerce Platform

Git, GitHub, Frontend Web Development

Team Project

[GitHub Repository](#)

- Collaborated with team members to develop and maintain features for an e-commerce platform.
- Contributed through Git-based workflows, pull requests, code reviews, and bug fixes.
- Participated in feature implementation, testing, and project integration activities.

CERTIFICATES & ACHIEVEMENTS

• Career Essentials in Generative AI

Professional Certificate

Microsoft & LinkedIn

Issued: Dec 2025

- **Core Skills:** Generative AI, Prompt Engineering, Microsoft Copilot, Responsible AI, AI for Business
- **Verification:** [View Official Credential](#)

• AI Tools Workshop

Workshop Completion Certificate

CertX

Issued: Oct 2025

- **Core Skills:** Generative AI, Prompt Engineering, Workflow Automation, AI-Powered Productivity
- **Verification:** [View Official Credential](#)

• Python 5 Star Gold Badge

Skill Certification Achievement

HackerRank

- **Core Skills:** Python Programming, Problem Solving, Algorithms, Data Structures, Debugging
- **Verification:** [View HackerRank Profile](#)

TECHNICAL SKILLS

Programming Languages: C++, JavaScript, Python

Databases: MySQL

Frameworks: React

Tools/Technologies: HTML, CSS, Tailwind CSS, Git, Postman, Firebase

Core Concepts: Database Management System (DBMS)
